Previous summer practice company: TÜRKSAT A.Ş.		
Specialization area: Telecommunications		
Summary of your summer practice activity: While being witnessed the final product tests at the HBT, I also made some research for sub components of ULAK Base Station.		
Do you recommend this SP location to other EE students for EE300 or EE400 and why? Yes because It is a quite different experience working in ASELSAN. I highly recommend the place for the students who wants to see the real life engineering life.		
Additional Comments: Aselsan Macunköy facilities are really good resources for engineering life.
